EXPERIENCE

Business Analyst   📅 May 2021 – Present

DigiTech Geeks   📍 Delhi

- Made wireframes, workflows and frd reports of mobile apps and websites for the company.Worked on software like AdobeXD, Balsamiq, Lucidchart, etc.

PROJECTS

Pizza Delivery System | Core Java
This project enabled the user to order the pizza according to his/her taste i.e., the ingredients to be added were dependent on the customer and therefore the price of the made pizza would vary accordingly. The price of order was also dependent on the distance of the delivery.

Street Light Monitoring System | Python, IOT, HTML, CSS, Javascript
This project enabled the user to switch on or switch off the street lights when necessary.

Text Messaging System Using Blockchain (In Process) | Blockchain, Web Designing, Python
To make a decentralized secure chat box for the companies so that their data cannot be leaked and the privacy of the users remain intact.
